# Ease of Publishing

Once they have entered Journal Connect through either our platform or the website, they will be asked to log in. They will either create a new account or log into their existing account. Again, using their University domain is critical. This email is used to both track published and submitted papers. It is also what ASME will use, if they enter into An Institutional Open Access agreement. This information will automatically either waive or discount all papers from This University for the entire subscription period

The screenshot shows the ASME Journals Connect website. At the top left is the ASME logo. In the top right corner, there is a link that says "Go to ASME.ORG Home >". Below the logo is a navigation bar with the following items: "Journals Connect" (with a mouse cursor over it), "Home", "About Journals", "Links" (with a dropdown arrow), "Author Center" (with a dropdown arrow), "Help", and "Feedback" (with a speech bubble icon). On the far right of the navigation bar is a blue button labeled "LOG IN".

Below the navigation bar, there is a sidebar on the left with a blue header "Applied Mechanics Reviews" and a right-pointing arrow. Under this header, two journal titles are listed: "ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems Part B: Mechanical Engineering" and "ASME Journal of Engineering and Science in".

To the right of the sidebar is a large section for "Applied Mechanics Reviews". It features a square image of a red, textured sphere. Below the image, the text "Applied Mechanics Reviews" is displayed. In the bottom right corner of this section, there is a link that says "Masthead | On-line journal".

# Ease of Publishing

The author will now go through several screens and be asked some of the following information:

- Which journal do you wish to publish your paper in, title of your article, word count, etc.
- What type of paper? Research, technical, etc.
- Have you considered publishing Open Access? (survey for ASME purposes)
- Author, co-author information
- After going through each screen of questions, they will ultimately upload their paper to submit

They will receive updates throughout this process via the email they provided upon submission. Once the Paper is accepted, they will log back into Journal Connect and see the following screen

# Institutional Open Access

## Open Access

### Individual Open Access

I understand that selecting Open Access involves additional charges, for which I will be invoiced. This fee will be automatically waived for authors at institutions that have signed a transformative agreement with ASME based on the affiliation listed in your account profile.

**⚠ There will be a charge for Open Access in the amount of \$3000.**

### Institutional OA

The publishing fee will either be discounted or waived if your institution has a Read and Publish agreement with ASME. The decision is based on the institution affiliation in your account profile.

- Tokyo University of Science
- Tokyo Institute of Technology
- Tokyo Denki University
- University of Queensland
- Hong Kong University of Science and Technology
- University of Sunshine Coast
- Curtin University
- RMIT University
- University of New South Wales
- University of Wollongong
- Auckland University of Technology
- CQUniversity
- Deakin University
- Monash University
- Queensland University of Technology
- Swinburne University of Technology
- University of Auckland
- University of Melbourne
- University of Technology Sydney
- Edith Cowan University
- Nanyang Technological University

I agree to pay the charges based on my request for Open Access. The paper will be accessible upon publication with a CC-BY license.

Yes. I am choosing to pay for Open Access  Yes, My institution has an OA agreement  No. I am declining the option of Open Access
