Advanced Content Search

Advanced Content Search enables user to conduct a comprehensive, focused search on the entire catalogue with highly relevant results. It is a powerful search engine allows to set detailed parameters for search, such as limiting it to a certain article/chapter title, publication name, author, or keyword(s), as well as giving you the option to set a particular date range and incorporate Boolean operators (AND/OR/NOT) into your search. It also provides advanced features like stemming, wildcard, proximity and category facilitating instant access to the desired section of content. Please note that the mobile-optimized website does not enable stemming.

Citation Search

If user knows the bibliographical details of required article, he/she can use Citation Search to precise their search. Enter a word in journal entry box, it displays list of all journals. Click on journal of interest and then enter volume, issue and page number. Click on Go to run the search
